

Youssef & Maii — Final Delivery

What each file is for · 8th of October, 2026

PHYSICAL DIMENSIONS FOR THE CUP AND TAMBOURINE REMAIN SUBJECT TO THE MANUFACTURER'S FINAL TEMPLATES. The cup artwork size (48 mm high) and the tambourine face (Ø150 mm) are working assumptions. The final dieline, printable area, scale, bleed and safe area must be confirmed against each manufacturer's template before production. **Resize by uniform scaling only.**

PDF — for the printer (vector, print-ready)

All PDFs are 100 % vector with outlined text. Gold artwork is on a dedicated FOIL_GOLD spot colour (metallic foil, 100 % solid, overprint). The invitation also carries its cream background as CMYK (C5 M8 Y11 K0). On screen FOIL_GOLD displays as gold; on press it separates as its own foil plate. Rename the spot colour if the printer's RIP uses a different name.
